

## Case Study:

### LDP - Creating Waves of Sustainability

People living in the under-privileged areas owing a very small piece of land or have no farmland to grow yield are provided Livestock for fattening and herd increase by OSDI. Beneficiaries are facilitated with animals such as goats, cows, buffaloes, oxen and sheep to increase their income generation.

Syed Gohar Ali Shah s/o Syed Hussain Shah is among those poor families in Saeed Abad who has been considered in this project. He is a resident of village Saeedabad, UC Rustam. He was the only bread earner for his family of 7 members. The earning from his private job did not allow him to fulfill his monthly expenses.

As, he had taken the challenge to educate all his children, the expenses were hard to meet. OSDI financed him three animals a cow, a goat and an ox with a total worth of PKR 75,000/-.

Rasool sold the ox during Eid ul Adha season for PKR 70,000/- earning a profit worth PKR 40,000/-and repaid his complete loan by including some money from his personal savings. According to latest update given by OSDI's veterinary assistant, the Goat and Cow provided to Rasool are now pregnant which have become assets.

He and his family are very happy and thankful to OSDI for creating sustainability in their lives.
